

APICS CPIM (Certified in Planning and Inventory Management)

16 Sessions, 64 Hours

On-line, Instructor-Led, "Virtual Classroom" via ZOOM

Course Description:

The APICS Certified in Planning and Inventory Management (CPIM) course provides a comprehensive body of knowledge and the best practices and standards to allow candidates to better respond to supply disruptions, handle demand variations, and manage supply chain risk.

Note:

CPIM 8.0 streamlines the learning and exam steps to achieve CPIM certification. With CPIM 8.0, there is only one class and one exam to pass. The exam will include all the topics and terms for the current CPIM Part 1 and CPIM Part 2 exams. Although the scope of the CPIM program remains the same, the depth of the knowledge is aligned more closely with the previous Part 2 exam content outline.

CPIM Certification Exam Information

The exam is an additional cost not included in this training program and must be scheduled and paid for directly through ASCM.

More information about the CPIM Certification Examination is available at:

<https://www.ascm.org/learning-development/certifications-credentials/exam-details/#VA>

Overview:

Earning the APICS CPIM certification demonstrates mastery of an organization's internal operations and an in-depth understanding of materials management, master scheduling, forecasting, production planning, and how these topics apply across the extended supply chain.

In addition to the guidance that you will receive in the classroom, you will also receive the APICS CPIM Learning System. The Learning System provides access to both printed and digital materials. The online platform also includes learning activities, a personalized study experience, microlearning, and convenient access to reading materials.

Who should attend:

This course would be of interest to a supply chain professional who wants to enhance career opportunities up through management level and beyond.

Prerequisites:

Although there are no formal prerequisites for this course, experience in supply chain—such as in operations, inventory, planning, or procurement—would be beneficial. Those that do not have this experience are recommended to take the "Essential Skills of Operations and Supply Chain Management" class. This is an excerpt from the CPIM Exam Content Manual published by ASCM:

"...there is a strong assumption that the candidate has experience and/or knowledge of basic methodologies related to planning and inventory management."

This is the equivalent of a college-level course that provides in-depth planning and inventory management knowledge. This class and the materials can stand alone as a valuable professional development tool; however, for those preparing to achieve certification designation by passing the exam, a minimum of 100 additional hours of self-study using the included learning system is highly recommended.

Topics include:

- Supply chains and strategy
- Sales and operations planning
- Demand
- Supply
- Detailed schedules
- Inventory
- Distribution
- Quality, technology, and continuous improvement

Learning Goals and Results:

- Increase inventory accuracy and reduce inventory
- Improve forecasting
- Improve the S&OP process
- Manage and apply capacity resource planning
- Work more productively with your company's ERP system

Employment Training Panel (ETP) Cost: \$1,470.00 per employee*

Non-ETP COST: \$2,942.00 per employee

WHEN:

Tuesdays

July 9, 2024 through October 22, 2024

4:30 pm to 8:30 pm

WHERE:

Online, Remote

"Virtual Classroom" Via

Zoom
