Low Observable (Stealth) TRAINING PROGRAM and CAREER OPPORTUNITY

>> **ENTRY-LEVEL TRAINING.**
>> **PROSPEROUS CAREER PATH.**
>> **STEALTH TECHNOLOGY.**
>> **YOU.**

Are you interested in starting a career through experience and exposure, all the while supporting a mission that seeks to ensure the security of our nation and its allies? If so, COC's Low Observable program may be for you.

Stealth technology, also termed low observable technology, covers a range of methods and materials used to make aircrafts, ships, submarines, missiles, satellites, and ground vehicles less visible to radar and other detection methods. This 170-hour course offers participants the opportunity to be on the cutting-edge of the latest low observable technology. The program aims to train and prepare participants for an entry-level job as a Low Observable Specialist.
